Rytons Rytweep® and Accessories

- Purpose made cavity weep hole duct, plus accessories, for traditional builds.
- **Rytons Rytweep** is a concealed weep hole duct showing only the edge of the small weep outlet when installed.
- **Rytons Rytweep Tube** allows extension of the Rytweep through blockwork or render.
- **Rytons DAMWEEP** protects the Rytweep outlet from blockage during rendering, or water penetration during flooding.

Rytons Cavity Weep Ventilators

- A range of cavity weep ventilators for use in timber frame builds.
- **Rytons Flyscreened Slim Vent® Minor** provides efficient cavity ventilation and drainage with the benefit of a flyscreen situated internally to prevent accidental blockage during or after installation.
- **Rytons Slim Vent Minor** is the original cavity weep vent. Unrestricted, it offers a high air flow allowing spacing at maximum centres.
- **Rytons DAMSLIMVENT** protects the SVFMIN and SVMIN outlets from blockage during rendering, or water penetration during flooding.
- **Rytons Slim Vent Major** is an extra-long Slim Vent providing cavity ventilation and drainage where blockwork or thick render are used.
- **Rytons Retro Weep Vent** is a retro-fitted cavity weep vent. Simply installed through a 25mm dia. pre-drilled hole it is the ideal solution when no provision has been made for cavity vents or weeps or an insufficient number have been installed.
