BBA Approval

Rytons has 73 British Board of Agrément approved products; the largest range on the market. BBA certification is third party evaluation and accreditation, and approved products are accepted by building control officers, architects, engineers and surveyors nationwide. The NHBC also accept products approved by the BBA when used as stated in the relevant BBA certificate. Rytons also has an Irish Building Regulation Statement for each of their three BBA certificates.

UK Regulations, Standards and Guidelines

British Standard BS 493:1995

Recommends that for a louvre design air brick the size and shape of the apertures shall be such that a steel ball of 9.5mm nominal diameter shall not pass through.

Handling Information

Box quantity: 10 number.

Box size: 35cm (W) x 28cm (H) x 23cm (D).

Box weight: 1.6kg.

Questions

Can the air bricks be painted?

As they are made from polypropylene it would only be possible to paint them if they had first been flame treated which is a specialist operation and should only be carried out by a specialist contractor.

Is colour matching available?

This product is available to order in non-standard colours, choosing from either a Rytons colour or supplying a RAL number. For further information ask about Rytons Colour Matching service.

What are the benefits of a Rytons Multifix® Air Brick over clay?

Rytons '9x6' Multifix® Air Brick won't break as easily as clay.

Rytons '9x6' Multifix® Air Brick has a higher free air space and so can be used less often saving you money.

Is Rytons '9x6' Multifix® Air Brick affected by sunlight?

The durability of Rytons '9x6' Multifix® Air Brick is largely due to its U.V. stabilising properties, which protect it from deterioration by sunlight. Please be aware not all air bricks offer this protection and will fade, detracting from the aesthetic appearance of the brickwork.

Please recycle printouts where facilities exist.
