

Technical Data Sheet

Rytons Flyscreened Roof Ventilator (for 600mm rafter centres)

Dimensional Drawing

Irish Reg. Stat.

Main Uses, Features and Benefits

- Roof ventilator for open eaves or exposed rafters.
- Maintains the path of air into the roof void.
- Overlapping flanges ensure secure fixing.
- 4mm ventilation slots promote unrestricted air flow.

H60 Plain Roof Tiling

Specification Clause 355

H61 Fibre Cement Slating

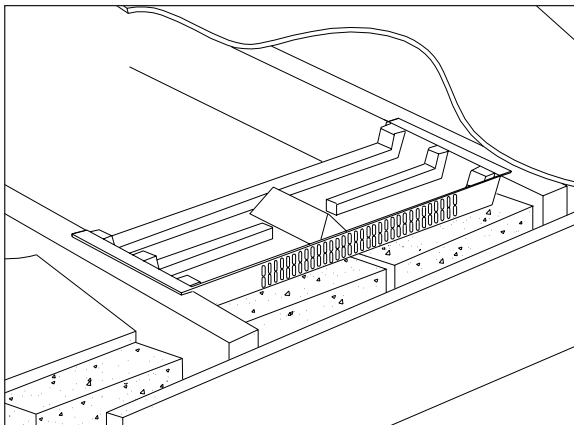

H62 Natural Slating

H65 Single Lap Roof Tiling

Specification Clauses 47, 355

In-Situ Line Drawing

Product Specification Code

Rytons TV600F.

Size

620mm (L) x 250mm (D) x 45mm (H).

R14 AutoCAD drawing available by e-mail.

Free Area

6000mm² per unit (10000mm² per metre).

Equal to a Continuous Opening

10mm wide.

Composition

Recycled PVC.

Colours

Black.

Specification Paragraph

Manufacturer:

Rytons Building Products Ltd Tel: 01536 511874 Fax: 01536 310455

Product ref: Rytons Flyscreened Roof Ventilator for 600mm rafters

(ref TV600F to BBA 94/3070)

Installation

Prior to laying roof felt, spike the flanges of the ventilator to the rafters. Wide, full length flanges facilitate overlapping, easy installation and prevent tearing/splitting. To avoid 'cold bridging' place the insulation beneath the roof ventilator and around the wall plates. Consideration should be given to using Rytons EavesGuard® (EG920) to prevent felt rot.

BBA Approval

Rytons has 73 British Board of Agrément approved products; the largest range on the market. BBA certification is third party evaluation and accreditation, and approved products are accepted by building control officers, architects, engineers and surveyors nationwide. The NHBC also accept products approved by the BBA when used as stated in the relevant BBA certificate. Rytons also has an Irish Building Regulation Statement for each of their three BBA certificates.

UK Regulations, Standards and Guidelines

British Standard BS 5250:2002 (amended 23 December 2005)

8.4.2.2.3.2 The openings should be equivalent in area to a continuous opening of not less than:

- 25mm x length at eaves for pitches of 15° or less.
- 10mm x length at eaves for pitches of more than 15°.

8.4.2.2.3.3 Additional ventilation openings, equivalent in area to a continuous opening of 5mm, should be provided at high level in:

- roofs where the pitch exceeds 35°.
- roofs of any pitch with a span greater than 10m.
- lean-to and mono-pitch roofs.

8.4.2.2.3.4 Ensure that:

- all airpaths between the insulation and the underlay, including those provided by proprietary eaves ventilation products, are at least 25mm deep, irrespective of opening size.
- ventilation openings are not blocked by insulation material, dust, airborne debris, paint or frost.
- entry of birds and large insects is prevented; to achieve that, and to avoid excessive airflow resistance, a normal mesh/grille size of 4mm is recommended.

The Building Regulations 2000, Approved Document C 2004 edition.

The Building (Scotland) Regulations 2004, Mandatory Standard 3.15.

The Building Regulations (Northern Ireland) 2000.

NHBC Standards 2006 7.2 - S11 (a).

Zurich Building Guarantee Solid Foundation Manual.

A roof will meet the requirements if it is designed and constructed in accordance with Clause 8.4 of BS 5250:2002.

Handling Information

Box quantity: 50 number.

Box size: 67cm (H) x 27cm (W) x 16cm (D).

Box weight: 4.5kg.

Questions

Does the vent have a flymesh?

All Rytons soffit vents feature 4mm wide ventilation slots, which form a barrier against birds and large insects. The addition of a smaller gauge mesh would dramatically increase the risk of blockage by airborne debris affecting the performance of the vent.

What can I use if I have different or uneven rafter centres?

Rytons Rafter Roll Ventilator (refer to technical data sheet RRV250) in conjunction with Rytons 10mm T-Strip (refer to technical data sheet TS610), which can be easily cut for uneven rafters.

What can I use to achieve a ventilation opening equal to 25mm?

Rytons Rafter Roll Ventilator (refer to technical data sheet RRV250) or Roof Ventilator (refer to technical data sheet TV600) in conjunction with Rytons 25mm T-Strip (refer to technical data sheet TS625).

What can I use for thicker insulation?

Rytons Deep Flyscreened Roof Ventilator is double depth and will effectively hold down thicker insulation, refer to technical data sheet TV600F5D.
